

Energy savings begin at home.

Residential Rebate Program

Choose energy-efficient upgrades and claim a variety of money-saving rebates, thanks to CenterPoint Energy's Residential Rebate Program. Rebates include heating and cooling equipment, smart thermostats and insulation upgrades.

Easy steps to save

1. If needed, find a contractor.

Some products must be professionally installed. Scan the QR code below to find a list of participating contractors.

2. Install new, qualifying products or services before Dec. 31, 2026.

3. Apply for your rebates within 60 days of installation online at CenterPointEnergy.com/SmartSavings or via mail, email or fax.

Get instant discounts.

Your contractor may be able to claim your rebates for you. Instead of applying for your rebate post-installation, ask your contractor if they offer instant discounts on energy-saving products such as:

- Air source heat pumps
- Central air conditioners
- Ductless heat pumps
- Natural gas furnaces

Who is eligible?

CenterPoint's residential customers who are replacing existing equipment or installing qualifying products as part of a newly constructed home are eligible for rebates.*

Start saving today.

To find a participating contractor, visit CenterPointEnergy.com/SmartSavings.

*New construction homes are not eligible for thermostats or insulation rebates through this program.
